

**DEVELOPING  
RENEWABLE  
ENERGY**

Monmet has been supplying hydro turbine and generator components to the hydro electric market for over 25 years.

Our parts are installed at hydro facilities throughout North America. We work closely with OEMs and power utilities with our network of global foundries and forge shops to provide our customers with the best materials and components available. Whether you are building a new facility or modernizing existing plants, our metallurgical expertise can help you make an informed decision.
